Amps to WattsAmps x Volts = Watts

BTUBritish Thermal Unit

To determine correct heater size:

1. Calculate the cubic feet of the area to be heated:
Cubic feet of area = Length x Width x Height
2. Take that answer and multiply by 0.133
3. The result of that answer is then multiplied by the change
In temperature you need to achieve.
4. The final answer is the number of BTU's required to heat that
Space to the temperature required.
(Area x 0.133) x Change in Temperature (in degrees)
